Sreyansh Srivastava

Kanpur, UP, India | sreyansh.sri30@gmail.com | 9555166756 | Sreyansh Srivastava | sherr30

Professional Summary

Software Engineer specializing in Java and Spring Boot, with hands-on experience building secure REST APIs and full-stack applications using React and PostgreSQL. Skilled in JWT authentication, database design, and Docker, with a focus on clean, reliable, and maintainable software.

Education

Pranveer Singh Institute of Technology *Dec 2022 – May 2026*
B.Tech in Computer Science **(77%)**

Gulmohar Public School
Class XII (CBSE): **77%** Class X (CBSE): **86%**

Experience

Associate Engineer Trainee — Nagarro *Apr 2026 – Present*

- Completed intensive technical training in Core Java, Advanced Java, Spring Boot, Spring Security, Hibernate/JPA, SQL, JavaScript, React.js, Vite, HTML, and CSS.
- Built full-stack applications using React.js, Vite, HTML, CSS, and JavaScript for frontend development, with Spring Boot and REST APIs for backend development.
- Gained hands-on experience with authentication using JWT, role-based authorization, exception handling, validation, and database design.
- Worked with Git for version control, Maven for dependency management, PostgreSQL for database management, and Docker for containerization.

Projects

JustEat Food Ordering Application *June 2026 – July 2026*

- Developed a full-stack food ordering application using React.js, Tailwind CSS, Spring Boot, and PostgreSQL.
- Implemented REST APIs and JWT-based authentication with role-based authorization for customer and restaurant-owner workflows.
- Built restaurant browsing, menu management, cart, and order placement features using Hibernate/JPA for database persistence; containerized the backend using Docker.

Traffic Sign Detection using Deep Learning *April 2025 – August 2025*

- Developed a CNN-based model to classify traffic signs using the GTSRB dataset, achieving 93% accuracy.
- Applied data preprocessing, augmentation, and normalization using TensorFlow and OpenCV.
- Implemented webcam-based traffic sign detection for driver-assistance applications.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Frontend:** React.js, Redux, Vite, HTML5, CSS3, Tailwind CSS
- **Backend:** Spring Boot, Spring MVC, Spring Security, REST APIs, Hibernate/JPA
- **Databases:** PostgreSQL, MySQL, MongoDB
- **AI/ML:** CNN, NLP, TensorFlow, Keras, Pandas, OpenCV, Streamlit
- **Tools:** Git, GitHub, Maven, Docker, Postman, Eclipse, VS Code
- **Concepts:** OOP, Data Structures, Multithreading, JWT Authentication, Exception Handling, Agile, SDLC

Achievements

- Earned the AWS Certified Cloud Practitioner certification.
- Achieved a **4-Star Problem Solving** badge on HackerRank.
- Completed a comprehensive Udemy certification on Complete Data Science, Machine Learning, Deep Learning, and NLP Bootcamp
